DETAILED ACTION

Allowable Subject Matter

1. Claims 22-36 are allowed over the prior art of record.
2. The following is an examiner's statement of reasons for allowance:

Regarding claims 22,29 the prior art fails to disclose or make obvious a flying height tester for a recording head of a hard drive having a computer that is coupled to the photodetector and determines a flying height, said coating thickness having a value so that a minimum intensity level of the reflected light beam is at a negative flying height, and in combination with the other recited limitations of claims 22, 29. Claims 23-28, 30-36 are allowed by the virtue of dependency on the allowed claims 22, 29.

The applicant in the specification defines the negative flying height when the coating thickness is $\text{wavelength}/(4n_c)$ and the layers are aligned in the same direction. In order for the air to cancel the layers, the substrate must rotate clockwise indicating that the flying height at which the intensity is a minimum is negative.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
